INTERIOR DESIGNS
Dipl. Ing. (FH) Innenarchitektur I
Graduate Engineer for Interior Architecture

Date 04.05.26

Author S. Jaensch / A. Alzeyat

For **CLINK**
HOSTELS

Project: CLINK BEDS

01 TENDER DOCUMENT

(Specification & Cost Overview)

DRAFT

General description

** All items must include delivery, installation, assembly and, if necessary, disposal of inventory. Existing building elements are to be protected during the construction phase, as well as traffic routes, which serve the common use in the house (corridors, staircase, elevators). the noise is to be reduced at any time to a minimum and neighbors, as well as the additional janitor should be informed about the work in the house.*

**Production, Delivery and Installation of custom-made beds including suitable certification incl. 1 pc. mock up bunk bed. All used materials must be durable, stable, washable and scratch-resistant (see technical prelims and material specifications). All materials must be approved prior to production by client. Equal materials and products to the spec attached can be proposed, a sample needs to be provided and approved.*

**All services and products must be checked in advance for correct execution on site. If there are any concerns, these must be reported immediately to the responsible project manager. If the lead product is not available, equivalent proposals are to be submitted to the project manager, stating the manufacturer and the item number, and approved in advance.*

**Please check the room layouts before starting your work. The contractor has to produce fully dimensioned shop drawings prior to the start of the contract and they have to be approved by the Investor/ client.*

Please note that the bunk beds need to come in different versions:

**mirrored/ not mirrored*

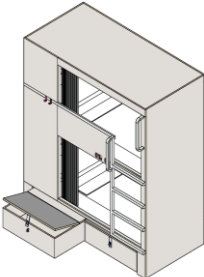

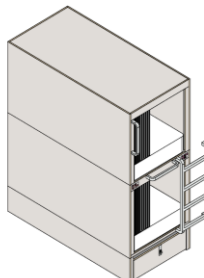

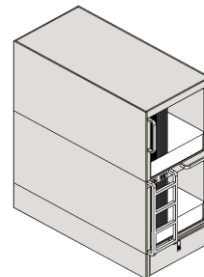

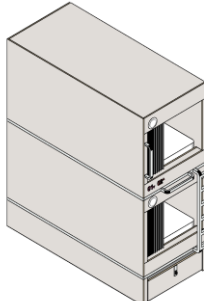

** with cut-outs for switches and sockets*

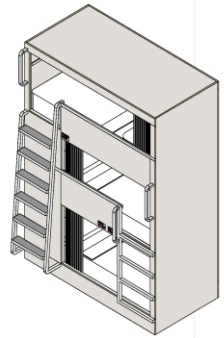

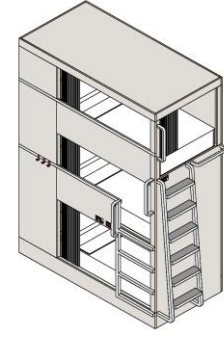

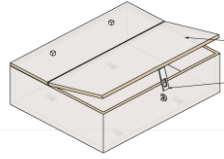

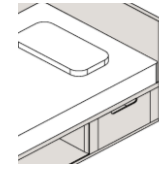

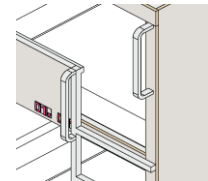

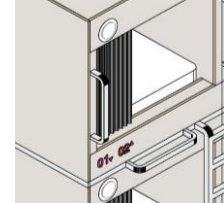

**with back panel for 'freestanding' versions*

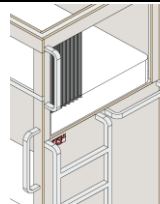

**smaller sizes etc.*

***Notes from Mep/ M&E consultant regarding electricity and fire, life and safety to consider:**

keep fuse spur/switch & sockets accessible all time

***GENERAL NOTES:**

The drawing package shows the ventilation method for the pods only. SJID is not responsible for the ventilation of the bunk beds/pods. Clink is to confirm whether any additional ventilation, health, safety, or regulatory requirements apply.

All measurements and designs have to be verified by the manufacturer! Discrepancies must be reported immediately to the responsible project manager. The manufacturer has to produce fully dimensioned shop drawings prior to the start of the contract and they have to be approved by the client/investor/interior designer.

Scope includes Materials, Production, delivery, installation and disposal of packaging
Lower side panels may be removed to allow cable connections.
